

HSC-205

solar charger top

Features

- Increased driving range by 20-30% (7-10 miles)
- Increased battery life
- Plug-In electrical Savings
- Solar System Rebates
- Drive Green Technology 100% renewable energy

Fitted models

- YAMAHA
- EZGO
- CLUB CAR
- FAIRPLAY/EVE
- TOMBERLIN
- STAR
- BAD BOY
- COLUMBIA

Specifications

Module	205 Watt poly crystalline silicon Tempered glass and anodized frame
Controller	Maximum Power point Tracking (MPPT) Multi-stage with bulk, abs, and float stages Temperature compensated voltage points LED charge indicator with error notification 36V or 48V with 91-97% conversion efficiency
Gauge	Integrated LED light bar
Format	Two-seater
Hardware	Powder-coated aluminum and stainless steel with rain gutters and integrated grab-bar
Wiring	Industrial grade with locking connection
Weight	55lbs
Dimensions	72" x 44" x 3"
Colors	Black - Standard (Custom colors upon request)
