

SOLAR POWERED MOBILE PHONES

Contact:manager@solartechsystems.com www.solartechsystems.com

Eco-Friendly

ATLANTS has developed a mobile phone that utilizes solar energy to recharge itself. It is the world's first to use solar power to recharge a phone battery.

They can be either charged by usual AC current by included charger or by solar thin panel built-in . SIMPLY, EASY AND FANTASTIC WHEN NO plug is available.

Specs of our SOLAR MOBILE PHONES are pretty impressive.

Models equipped with latest technology in mobile communication as well as digital camera, MP3 , MPEG4 players , Voice record, video capture and playback , polyphonic & MP3 ring tones , mobile U disk function , bluetooth support , card support , GSM & GPRS network (900/1800/1900Mhz), MMS & WAP support , touch screen handwriting recognition , super large capacity Lion battery etc...and EXCLUSIVE SOLAR MOBILE TECHNOLOGY
